- How to become an Approved Supplier for New Mexico Grown
- Tips for purchasing from local producers
- How to integrate local products into your program
- Best practices for growing good purchasing relationships

NEW MEXICO GROWN

New Mexico Grown is a statewide local food purchasing program for public institutions and food banks operating nutrition programs that serve early childcare education sites, k-12 schools, senior centers, and food banks. The program supports the purchase of locally grown fresh fruits and vegetables, minimally processed products, and meat grown by our small family farms and ranchers.
